SysGroup

AI/ML Discovery Workshop

Format: Two-day interactive workshop (flexible delivery over consecutive days or as one intensive session)

What This Session Delivers

A fast-paced, expert-led session designed to help your team:

- Identify high-impact Machine Learning opportunities tailored to your organisation's challenges
- Align stakeholders around real business problems – no technical background required
- Walk away with a prioritised set of use cases and a clear, actionable roadmap

What to Expect

Delivered over two sessions, this workshop will:

- Rapidly generate ideas through hands-on, facilitated exercises
- Use real-world examples to guide practical thinking
- Help your team narrow down to 3 actionable AI/ML initiatives
- Provide a structured post-workshop pack, including:
  - Workshop slides
  - Annotated idea board with votes and comments
  - Follow-up plan with next steps

Who Should Attend?

This workshop is ideal for:

- Innovation and Digital Transformation Leads
- Service Delivery or Operational Heads
- AI/Data Champions exploring practical ML use cases
- Leadership teams looking to take a confident first step into AI

Why It Works

- Structured and time-boxed format over two days (or custom to your schedule
- Tailored to your sector and priorities – not a one-size-fits-all approach
- Delivered by AI/ML practitioners with experience across the public, private, and third sectors
