The SME Cyber Challenge

Cybersecurity is no longer just an enterprise issue. Today, **43% of cyberattacks target SMEs**, and yet only a small fraction are prepared to defend themselves. UK businesses lost £3.4bn in 2024 to cybercrime, with phishing, ransomware, and supply chain breaches among the most common threats.

SMEs face a perfect storm:

- Complex compliance (GDPR, NIS2, ISO 27001).
- Human error — the #1 cause of breaches.
- Supply chain exposure from third parties.
- Disjointed strategies that leave gaps unaddressed.

SysGroup exists to simplify this complexity.

We deliver **affordable, practical cybersecurity services** designed for SMEs and mid-market organisations.

Why SysGroup?

Certified expertise
CREST, CISSP, ISO lead
auditors, experienced
consultants

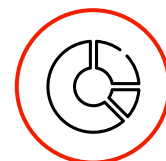

Practical, business-first
approach
not just tick-box compliance

Trusted in regulated
sectors
finance, healthcare, legal, SaaS

Tailored to SMEs
services scaled to budgets and
growth stages

Proven results
measurable improvements, strong
client retention, referrals

We don't just find
risks - we help you
close them.

Our Services

SysGroup's cyber services fall into three pillars:

Prevent Threats

Build strong foundations that reduce your attack surface.

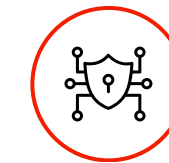

Cyber Risk Assessments

identify vulnerabilities and
prioritise fixes

Policy & Standards Development

embed clear, simple security
practices

Cybersecurity Strategy & Maturity Assessments

benchmark your current
posture and create a roadmap

Threat & Risk Modelling

understand your attack
vectors

Dev Assurance & Secure Code Reviews

catch flaws early in development.

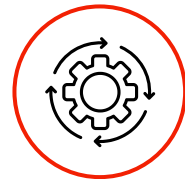

Protect Data

Safeguard sensitive information and maintain trust.

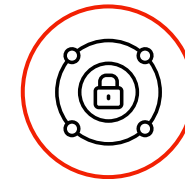

Data Protection & Privacy Advisory

strengthen compliance with GDPR/DPA.

Data Loss Prevention (DLP) Implementation

prevent accidental leaks.

Cybersecurity Awareness & Training

empower staff to act as your first line of defence.

Post-Breach Training

remediate awareness gaps after incidents.

Prepare & Respond

Prove you can withstand and recover from real-world threats.

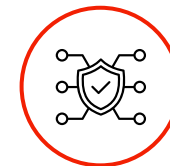

Penetration Testing

External, Internal, Web App,
Cloud, Mobile, Wireless, Social
Engineering

Breach & Attack Simulation (BAS)

continuous resilience validation.

Cyber War-Gaming & Tabletop Exercises

stress test crisis response.

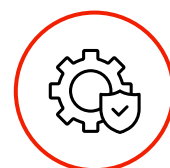

Business Continuity & Disaster Recovery (BC/DR) Planning

keep operations running.

Backup & Recovery Testing

validate that restores actually
work

Third-Party Risk Management

manage supply chain security

Vulnerability Management Services

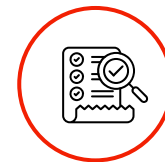

Tenable-powered dashboards, risk
governance, and closure tracking.

Compliance & Certification Readiness

Remove the guesswork from regulatory audits.

ISO 27001 Maturity &
Certification Readiness
step-by-step plans to pass first
time

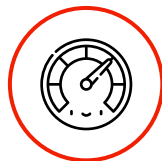

Audit-Ready Evidence Packs
· templates, checklists, and
board-level reporting

Regulatory Advisory
FCA, PRA, NHS DSPT and
sector-specific compliance

The SysGroup Difference

Unlike traditional providers, SysGroup offers:

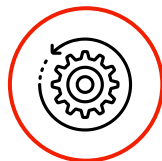

Speed & Agility

tests and assessments
delivered in days, not months

Outcome-Focused Deliverables

developer runbooks, prioritised
fixes, dashboards, not just
static PDFs

Risk Reversal Guarantee

if our findings aren't actionable, we'll fix
them and support implementation at
no extra cost

Flexible Engagements

fixed-scope projects or draw-down
day programmes to fit budgets

Did you know?

We are the only **Managed Services Provider (MSP)** partnered with **Zscaler** in the UK, the global leader in cloud security. That means our clients benefit from unmatched expertise, privileged access to cutting-edge tools, and tailored services no one else can deliver.

Conclusion: Simple, Practical, Affordable Cybersecurity

Cybercrime isn't slowing down, and UK SMEs are firmly in the firing line. Attacks cost billions each year, and for many, the real impact is lost trust, fines, and downtime.

That's where SysGroup comes in. We cut through the noise with:

Clarity

plain-English reports you can
act on

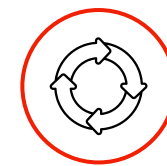

Confidence

CREST-certified testing and
proven methodologies

Control

remediation runbooks,
workshops, and free retests

Continuity

resilience planning that keeps
you operating under pressure

And we make it accessible: no enterprise overheads, just transparent services and prices you can trust.
